"The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundred fold, in some cases almost incalculably; unreasonably; and speculation has been rife...

from The American Journal of Numismatics, Vol. 1, No. 1, May 1866.

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee. Over ten years of business I have never had to make good on this promise. But I make it anyway for your protection.

2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.

3. A full thirty day return privilege is allowed on all purchases. Returns may be made for any reason, or no reason. My business depends on attracting repeat customers. It does neither of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been optimistic about the grade. It can happen. But it is not my intention. I encourage you to use the thirty days as an approval period. Feel free to show your purchases to other knowledgeable EAC members. Get a second opinion. All sales are final after the thirty day period, though I will certainly consider an extension upon reasonable request.

4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request.

5. All orders are sent postpaid.

6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced "value" or "net" grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin. I describe these defects and deduct from the technical grade based on their presence. As an example a coin might be described: "1805 S-267 VF20 Sharpness of VF30 with smooth brown surfaces, some light pin scratches where corrosion was removed at 11 reverse." Here is a coin VF30 by ANA standards but with scratches at one o'clock on the reverse. Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points

from the overall grade. The first grade listed represents the net or value grade. Clearly this is an art and elements of subjectivity are inevitable. Where there is no second grade listed. It is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase. No unpleasant surprises!

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC rarity ratings as compiled by Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings die state and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only.

Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large Cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgments and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

8. I have yet to meet anyone who has bought coins merely as an investment who has realized a net return upon liquidation. I have, however, met numerous serious collectors, who having formed a discriminating collection over a period of years realized a substantial profit when their collection was ultimately sold. Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose.

Coin dealers are often more than willing to give investment advice. As my good friend Jack Robinson, (who's collection did very well for him when it was sold in 1989), likes to say. THINK ABOUT IT! When you ask a cat which canary to buy remember his first concern may not be how well it sings! There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a much better chance of success.

This is my annual November /December Holiday catalog and there is a 10% discount off every item listed. I believe there are some great coins offered. I recently purchased the major portion of an important Half Cent

as well as a significant number of coins from the recently dispersed holdings of Allen Meghrig. I try to present a wide range of collectible coins and this list should be no exception with coins ranging from the finest known 1794 S-28 to a nice VG8 early die state 1849 N 8. I hope there will be something for everyone. This will be my last catalog for 1993 and I want to thank all of you for your patronage during the past year and wish you the best for 1994.

Bob Grellman and I will be holding our all early copper auction at the F.U.N. convention Saturday night January 8th. Catalogs will go in the mail the first week of December. If you can't be there in person remember to bid by mail. I will be attending the following conventions: St. Louis Nov. 11-14, Dallas, Tx. Dec 3-5., Orlando Fla. F.U.N. Jan. 5-9. Hope to see you there.

Many have since been discovered since then. As with most late date varieties the true scarcity of exceptional pieces is yet to be determined Examined by JRG. This example is currently tied with two others for finest known of the variety. (color photo)

COMMENTS

**REMEMBERING THE JACK ROBINSON COLLECTION
ARE WE HAVING AS MUCH FUN YET?**

A few months ago a collector friend and client asked me for some advice on building a numismatic library. A relatively new collector of Large Cents, his library lacked many important references especially in the area of auction catalogs. I sent him a good boxful of material. Included in the box was a copy of Superior's January 1989 sale of the Jack Robinson collection. I have more than a passing familiarity with the sale as I still carry my bound sale copy with me to shows and refer to it regularly. Perhaps it took a pair of fresh eyes to remind me what I have been looking at all these years.

After the box arrived I received a call: "What is this Jack Robinson catalog? Are some of these coins still available? Why did he sell such a great collection? How did he put it together? How long did it take?" And then questions about specific coins: "How can I find such a choice S-286? Will lot 635 ever be available again? Is that really a die cud on

through the stars? Can you find where lot 456 the S-215 went?"

I had forgotten. There have been so many great sales over the years: Floyd Starr, R.S. Brown, Halpern; all of them substantial sales with plenty of eye catching coins. The JHR sale was more than eye catching. It was a smorgasbord that provided something for every taste. The S 48 was probably the finest example, with the possible exception of the Adams coin, that has sold publicly in decades. The S-7 and S-53 were likewise spectacular coins. I was sitting next to Jack at the Wyatt sale where he purchased the 1793 NC 6, one of only two known, and later at RSB where he completed his Sheldons by buying the S-79. But these rare and spectacular coins are not the most memorable to me. What I remember about Jack's collection building are the numerous five, ten and twenty dollar coins Jack would come up with. He would come walking back to our table in the quick excited way that meant he had found something. "What do you think of that!" he'd say, and there would be a beat up VG7 1810 Large Cent. I'd mumble something like, "Uh, you didn't buy this for stock did you Jack?" and try to hand off to Doug Bird who was usually nearby. "No, No it's for my collection. Have you ever seen S-283 without clashmarks?" A sideways glance to Doug who's looking up in the rafters "No... can't rightly say I ever thought to." Pretty soon between Doug & I we'd have six or seven S-283s spread out on the table. All of them of course with pronounced clashmarks. Except for Jack's which had no sign of ever having thought of developing clashmarks. And Jack would be across the table with that half a grin and an eyebrow raised; happier than a pig in mud.

We have had some pretty spectacular Cents on the market in the past couple years. The dispersal of the Naftzger Early dates and the numerous "trade ins" that have become available as a result of the placement of these wonderful coins has made it appear that choice Large Cents are a dime a dozen. Read instead, plentiful. Because the full page ads in Coin World we see offering fifty and hundred thousand dollar coins give the impression that Large Cent collectors have pockets lined with gold. Don't get the idea that I am putting down these wonderful coins that have been available. There are a few of them listed in this catalog and of course I hope someone will buy them. But they are not really the heart of what collecting is about.

When the JHR sale took place there were many coins I remembered having seen or discussed. The F15 42 small date with a die crack on the rev. and the 32 N-1 with the stars drawn out to the rim. The corroded 35 N-13 but with an interesting double profile.

Sure the S-53 sold for a whopping \$32,000 and the S-79 reeded edge brought \$58,000. The EF45 1816 N-1 brought \$7250 and the 1848 small date brought \$6750. Perhaps coins like these were the meat & wise of the collection. But the heart of the collection is represented by the four different die states of 1796 S-115; the last of which was a horribly scudzy but rare AG3 terminal state with an honest to goodness rim cud at RTY; or the five different die states of 1798 S-167 every one a keeper and ranging in grade from VG8 to AU55; or the choice VG7 EDS 1801 S-215 or the nine different die states each of 1831 N-9 and 1831 N-12. At some point in the sale, perhaps near the end when lot 1787 the 13th of the 18 die states of 55 N-9 knob on ear came up for sale, Larry Goldberg wondered aloud, "Does anybody know why we devoted a quarter page of catalog space and a photo to a \$12 coin?"

Sure! Somebody knew. He was sitting up at the front of the room.

Watching the collection he had built being divided up among his friends. Five years later I'm sitting here late at night thumbing through this January 30th 1989 catalog. Thanks to a collector friend of mine I'm seeing things I haven't seen for a while. I'm wondering who ended up with VG7 EDS 1797 S-120a. I'm trying to remember if I've seen an S-126 as early as lot 240 or as late as lot 242. I'm chuckling that the best 27 N-7 is just a VG7 but I just checked my Robbie Brown, Matthews and Mendelson catalogs to see if the rims often come dished like on JHR:868 (they don't). I'm wishing I had stretched a little more on the MS60+ 1847 N-4. Five years later I'm wondering if we have learned enough from Jack Robinson's collection. I wonder if we're having as much fun yet.

BOTTLE CAPS REDUX

Thanks to all of you who have been sending my kids bottle caps. They have been getting caps from all over the country. From Charlie Barasch, Montpelier Vt. an almost complete run of Vermont Breweries. From Ed Kucia, discoverer of the 1797 NC-8 variety, a number of new varieties from Ohio, Bill Quain Pennsylvania caps. I could go on but thanks to all of you. At Paul Padgett's show in Cincinnati I ran into Bill Eames of "the beer club". (I guess this is something like "The Hair Club" for men, but for people who care more for a belly full of beer than a head full of hair) Bill was running a beer camp at the Drawbridge at the same time Paul's show was there. There were hundreds of campers trying out enormous varieties of beer. Bill shared the bottle cap story with all his campers and we have been getting caps from all over the country as a result. This is fun!
